## Raymarine CAM100

The Raymarine CAM100 instantly transforms Raymarine C Series Widescreen, E Series Widescreen, E Series Classic and G Series into powerful onboard video observation systems. Improve docking safety by monitoring blind spots or keep track of the engine room and crew from the helm. Use multiple cameras for total view of your vessels surroundings. The camera uses a highly sensitive IR sensor to switch from true colour to black and white night vision mode.

Choose Raymarine CAM100 with Reverse Image for aft deck or engine room applications.

### Raymarine CAM100 Features

Transforms Raymarine G-Series, E-Series, or C-Series Widescreen displays into an onboard video observation System Automatic switching between true color (Day) and black & white (night)

Clear focus at night with Anti-IR focus distortion technology built-in

Ideal for monitoring blind spots, decks, engine room, and cabins
