

# True-Marine™ Entertainment System for DVD

---

## MS-AV700i

The NMEA Technology award winning 700 Series is the most advanced marine entertainment system in the world. Representing the perfect mix of innovation, functionality and simplicity the purpose built for the marine environment, designed and engineered to 'True-Marine™' standard in New Zealand for an unbeatable marine entertainment experience.

**Sources** - AM / FM / VHF / USB / AUX / DVD / CD / iPod / iPhone / MTP

### Features

- Innovative Multi-Zone™ 4 Zone Control - Adjust the volume and subwoofer level in four separate zones on-board your vessel. Zones are nameable for added convenience. For localised zone control, install FUSION's MS-NRX200i Wired Remote Control. Note Zone 3 and 4 require additional amplification, all subwoofer lineouts require amplification.
- DVD/CD Audio and Video Playback - Enjoy your favourite music CD's and relive your classic family home DVD movies through the marine grade, shock protected DVD mechanism of your MS-AV700i. An infrared remote is included, or utilise the FUSION-Link™ remote control app for Apple or Android to control the movie experience on the water.
- iPod/iPhone/USB Audio Support - Featuring smart controls and intuitive menu navigation, the MS-AV700i offers a replication of the apple interface like no other marine stereo. For water resistant protection of your iPod, iPhone or USB flash drive connect the MS-UNIDOCK (sold separately) for protection, charge and playback on the waves.

- MTP (Media Transfer Protocol) Audio Support - Connect your supported Android or Windows smart phone via USB for quick access to your entire music library, for unbeatable music playback while at sea. Update your software to access this functionality. For water resistant protection of your MTP supported device, add the FUSION UNI-Dock, which will protect, charge and play all compatible devices (sold separately)
- Bluetooth Audio Support - Add the MS-BT200 or MS-BT100 to your FUSION 700 Series marine entertainment system to enjoy wireless streaming of your favourite audio tracks
- FUSION-Link™ - Certified marine Multi-Function Displays (MFD's) become the entertainment control centre for the entire vessel once connected to the MS-AV700i Marine Entertainment System via a NMEA 2000 or Ethernet connection.
- NMEA 2000 Certified - Connect the MS-IP700i to an existing NMEA 2000 network and communicate with FUSION-Link™ Certified MFD's and FUSION's NMEA 2000 Certified wired remote controls (CAB000852 Drop Cable and CAB000581 T-Connector required for NMEA 2000 connectivity - sold separately).
- Ethernet Ready - Supports FUSION-Link™ Certified MFD's, iPad, iPhone and Android wireless remote control apps via your Ethernet network. Note an All-In-One DHCP Wireless Ethernet router is required for app connectivity. FUSION-Link wireless remote control app for iPad, iPhone and Android is available for FREE for a limited time from iTunes or Google play.
- Simplicity in operation - Navigation and control of the entertainment experience is simple with FUSION's operating system. Most controls are executed via the large rotary encoder, with FUSION Alpha Search Technology (F.A.S.T™) allowing for quick navigation through thousands of songs in seconds. Album art is displayed in colour on the LCD display and all FUSION-Link applications (MFD and all mobile apps).

Encased in a fully sealed aluminium chassis, the 700 Series has undergone and passed vigorous marine environmental testing and is rated IPx5 water resistant, supported by a 3 Year True-Marine™ Warranty

# True-Marine™ Stereo

---

## MS-RA205

Introducing the world's most advanced compact marine stereo, the MS-RA205 with FUSION-Link™ NMEA 2000 connectivity. This fully featured marine stereo delivers powerful, clear and dynamic sound, all encased in a chassis which measures a mere 93mm - 3-5/8" in depth.

Powered by the advanced ARM-9 Processor, the MS-RA205 offers quick and intuitive audio control. FUSION's iPod/iPhone interface allows smart navigation of the iPod menu structure and offers selection of songs by artist, song, playlist, album, genre or composer.

This 'True Marine™' Product is covered by a 3 Year Limited Consumer Warranty.

## FEATURES

Sources: AM/FM/VHF/USB/iPod/iPhone/MTP/Bluetooth\*AUX/SiriusXM-Ready (USA Only)\*\*

NMEA 2000 Certified

FUSION-Link™ Enabled

VHF Receiver

iPod & iPhone video playback (With supported iPod models and MS-DKIPUSB Dock)

Multi-Zone Technology

MTP (Media Transfer Protocol) Audio Support for compatible Android and Windows smartphones.

## **MTP**

Connect your supported Android or Windows smart phone via USB to your MS-RA205 for intuitive and quick access to your entire music library, for unbeatable music playback while at sea. Please download the latest FUSION software [HERE](#) to access this functionality. FUSION Supports a range of smartphones utilizing MTP. Please refer to the compatibility list [HERE](#). For water resistant protection of your MTP supported device, install the FUSION UNI-Dock™ which will protect, charge and play all compatible devices and is large enough to house the Samsung Galaxy S4 with ease. (MS-UNIDOCK is sold separately)

## **Bluetooth Audio Streaming**

Add the MS-BT200 or MS-BT100 to your FUSION 205 Series marine entertainment system to enjoy your favourite audio tracks within range, around your vessel.

The external MS-BT200 Bluetooth module is designed to provide Bluetooth audio streaming from a compatible smartphone or media player directly to your FUSION marine stereo. The MS-BT200 is connected to the Satellite Radio (SiriusXM) connector of your stereo.

Note: The MS-BT200 cannot be operated simultaneously with a Satellite Radio (SiriusXM) receiver. For installations where the Satellite Radio (SiriusXM) socket is not available the FUSION MS-BT100 audio only Bluetooth module is recommended.

The MS-BT200 supports control (Play/Pause/Next/Back) of the media device from the FUSION Stereo. Song information such as song title, artist name and duration are displayed, depending on the capability of your phone and music application.

The MS-BT200 does NOT provide phone call control. Hands free operation of the phone is not supported from the FUSION stereo.

## **NMEA 2000 CERTIFIED:**

Connect to an existing network (additional cable required) and communicate with FUSION-Link™ certified marine electronics and FUSION MS-NRX200i wired remote controls.

## **FUSION-Link™:**

Certified NMEA 2000 Multi-function displays (MFD) can connect to and interface with the MS-RA205 over the NMEA 2000 network. Once connected the MFD becomes the control centre for the entire vessel.

## **VHF RECEIVER:**

Adjustable squelch, channel scan and user pre-sets are available.

## **iPod & iPhone VIDEO PLAYBACK:**

With the addition of the MS-DKIPUSB (sold separately) your iPod or iPhone is securely housed and protected from the marine environment whilst being charged. When the MS-DKIPUSB is connected to a compatible monitor, video stored on your iPod or iPhone can be enjoyed on screen.

**MULTI-ZONE™ TECHNOLOGY:**

Adjust the volume and balance level in two separate zones onboard your vessel. Zones are nameable for added convenience (e.g. Zone 1 can be named 'Helm'). For localised zone control, install up to two MS-NRX200i wired remote controls. In instances when the MS-NRX200i is installed onto a NMEA 2000 network the remote can be configured to display user selectable data from other NMEA 2000 products connected to the same network\*\*\* (e.g. Depth or Speed over water) Note: The MS-NRX200i is the only wired remote control solution for this product, the MS-WR600C or MS-WR600G is only compatible with the MS-RA200.

## MS-IP700i

The NMEA Technology award winning 700 Series is the most advanced marine entertainment system in the world.

Representing the perfect mix of innovation, functionality and simplicity the purpose built for the marine environment, designed and engineered to True-Marine™ standard in New Zealand for an unbeatable marine entertainment experience.

**Sources** - AM / FM / VHF / USB / AUX / iPod / iPhone / SiriusXM-Ready (USA only) Requires additional Sirius Connect Vehicle Tuner

### What's New

Improved Connectivity - The MS-IP700i features an external USB connector and an improved marine grade remote network connector for added reliability and simple integration with a NMEA 2000 network.

### Features

- Innovative Multi-Zone™ 4 Zone Control - Adjust the volume and subwoofer level in four separate zones on-board your vessel. Zones are nameable for added convenience. For localised zone control, install FUSION's MS-NRX200i Wired Remote Control. Note Zone 3 and 4 require additional amplification, all subwoofer lineouts require amplification.
- Internal iPod / iPhone dock – Charge and playback audio from your supported Apple device while protecting it from the harsh marine environment. FUSION's award winning audio interface offers quick and intuitive navigation so the tunes keep rocking no matter the conditions.

- MTP (Media Transfer Protocol) Audio Support - Connect your supported Android or Windows smart phone via USB for quick access to your entire music library, for unbeatable music playback while at sea. Update your software to access this functionality. For water resistant protection of your MTP supported device, add the FUSION UNI-Dock™, which will protect, charge and play all compatible devices (sold separately)
- Bluetooth Audio Support - Add the MS-BT200 or MS-BT100 to your FUSION 700 Series marine entertainment system to enjoy wireless streaming of your favourite audio tracks
- FUSION-Link™ - Certified marine Multi-Function Displays (MFD's) become the entertainment control centre for the entire vessel once connected to the MS-IP700i Marine Entertainment System via a NMEA 2000 or Ethernet connection.
- NMEA 2000 Certified - Connect the MS-IP700i to an existing NMEA 2000 network and communicate with FUSION-Link™ Certified MFD's and FUSION's NMEA 2000 Certified wired remote controls (CAB000852 Drop Cable and CAB000581 T-Connector required for NMEA 2000 connectivity - sold separately).
- Ethernet Ready - Supports FUSION-Link™ Certified MFD's, iPad, iPhone and Android wireless remote control apps via your Ethernet network. Note an All-In-One DHCP Wireless Ethernet router is required for app connectivity. FUSION-Link™ wireless remote control app for iPad, iPhone and Android is available for FREE for a limited time from iTunes or Google play.
- Simplicity in operation - Navigation and control of the entertainment experience is simple with FUSION's operating system. Most controls are executed via the large rotary encoder, with FUSION Alpha Search Technology (F.A.S.T™) allowing for quick navigation through thousands of songs in seconds. Album art is displayed in colour on the LCD display and all FUSION-Link™ applications (MFD and all mobile apps).

Encased in a fully sealed aluminium chassis, the 700 Series has undergone and passed vigorous marine environmental testing and is rated IPx5 water resistant, supported by a 3 Year True-Marine™ Warranty.
