

KXM Amps were built for the outdoors. Power, speaker and input connections are gasket-sealed, as is the control cover hiding the settings, creating a water-resistant barrier to key components

**KXM400.2 Amplifier**

## KXM Amplifiers

Kicker Takes proven technologies and advance components to the water KXM series Marine Amplifiers. Based on the critically acclaimed KX series Amplifier line for cars and trucks, weather resistant KXM Amps utilise class leading features specific for unbelievable sound in the boating environment and within the most compact chassis for installing in tight locations.

**KXM1200.1 Amplifier**

## Built for the Outdoors

KXM Amps were built for the outdoors. Power, speaker and input connections are gasket-sealed, as is the control cover hiding the settings, creating a water-resistant barrier to key components. The internal circuit board is sprayed with a moisture-detering conformal coating for water and dirt resistance. The amplifier's power connections meet marine-industry standards for protection against the elements. Stainless-steel mounting hardware prevents rust stains on carpeting and gel coat, and the UV-treated chassis finish battles harsh sunlight.

**KXM400.4 Amplifier**

## Smaller Footprint

KXM Amplifiers set the curve for smaller chassis footprints, with the largest model measuring at around 320mm long. KICKER amps feature an optimised circuit layout for the most efficient use of components, the smallest footprint and clearest sound quality. All three models use balanced differential inputs, making them compatible with any factory radio and eliminating unwanted noise so listeners enjoy the cleanest sound possible.

### **KXM800.5 Amplifier**

KM coaxials are designed specifically for boat audio with weather-proof qualities that meet or exceed industry standards.

### **KM8" LED Lit Coaxial**

## **Grille Options**

These bold stylishly designed coaxials come packaged with easy to match charcoal or white grilles for a customised look.

## KM6.5" LED Lit Coaxial

# Multi-Color LEDs

These coaxials will brighten any boating experience with multi-color LED lights that can be changed to fit your mood or craft.

Twenty color options as well 19 dynamic modes are available when using the optional KMLC remote.

## Maintain!

UV treatments on the coaxials' injection-moulded cones, Santoprene® surrounds, baskets and grilles help all models maintain in marine environments. These speakers can endure almost any weather conditions with splash-and-spray-resisting sealed motors, cones and locking terminal covers. Speaker hardware is forged from rustproof, 316 stainless-steel.

## Optional LED Remote

Customise your LED lighting to get the perfect look for your boat. The KMLC remote provides multi-function control of LED lighting by managing 20 different colors and 19 dynamic modes, including adjustable brightness, fade, speed/strobe and auto save.

## Spectacular Highs

Spectacular highs and midrange sounds with the simplest of speaker installations, provide full-range audio specifically for a marine environment.
